

**Like Nu** is specially modified cement! It is extremely adhesive, super hard, water and oil repellent yet breathable.

Created by coating polymer scientists with over 60 years of combined experience in new molecular system, Like Nu is a new way to protect and beautify exterior and interior concrete.

Use it on garages floors, driveways, sidewalks, parking garages, concrete walls.

Apply Like Paint*

## THE PROBLEM WITH CONCRETE

---

Concrete is functional and uniform when first installed. Exterior concrete surfaces however, are vulnerable to weather because concrete is extremely porous. Concrete surfaces quickly lose their aesthetic beauty because they soak up water, solvents and oil. Absorbed contaminants cause discoloration and staining. Freeze/thaw cycles cause, spalling, cracking and deterioration.

## TRADITIONAL FIXES

---

Until now, there was no workable solution to weathered concrete; only short-term fixes. Spalled and cracked areas can be filled with new or acrylic modified cement. However these usually leave an unsightly patchwork of multicolored areas on walls and horizontal surfaces. Typical paints discolor with exposure or stain with oil. Most coatings will also blister or peel as water vapor pressure builds beneath them because they are not water-vapor permeable.

## WHAT IS NEEDED?

---

The longer-term solution is a coating that permanently adheres to the cement, looks like cement and will not peel or flake off. The coating should repel water and oil yet it must be water-vapor permeable to allow the substrate to breathe. The coating should provide a uniform color and make the surface look like new.

## THE ANSWER IS “Like Nu”

---

Like Nu is a cementitious coating that is applied in thin coats just like paint.

Like Nu is not paint. Although it looks and applies like paint, it is specially modified cement.

Like Nu is water vapor permeable and will not peel or flake off. Yet, Like Nu will repel water, oil and solvent.

Like Nu can be colored to match the existing surface or to change the color of the existing surface.

Like Nu is easy to apply with brush, roller or sprayer.

Like Nu cures quickly and can withstand precipitation or light traffic within one hour of application

## HOW IT WORKS

---

Like Nu is a specially formulated water-based blend of cross-linking acrylics combined with a patented water and solvent repellent.

Like Nu is a liquid that is mixed with cement and water at the job site and is ready to use within 20 minutes. Like Nu is then easily applied with sprayer, brush or roller in 2 or more thin coats “wet on wet”. The recommended final film thickness of Like Nu is about 25 mils.

## WHAT IS THE SECRET?

---

Like Nu is specially modified cement! It is extremely adhesive, super hard, water and oil repellent yet breathable. Any coating without all four of these important properties will fail to solve the problem. Like Nu is the first coating to have all four attributes once. There is nothing like it available anywhere else.

Make your concrete Like Nu!
