NEW MILLENNIUM PROTECTION

a revolutionary new high quality
polymer coating

While weatherproof coating manufacturers say their products will waterproof your deck, the coating you apply today will probably need recoat by next season.

Rain, snow and sun attack conventional coatings leaving your wood siding and deck and wood exteriors unprotected from the weather. Most wood coatings on the market cannot claim to really last even one year.

Weather can be especially destructive to cedar shakes. Precipitation causes the wood to swell and within time, the shakes become porous and begin to curl, losing their beauty and protective strength.

How can you provide long lasting, cost effective protection for your wood roof and deck?

The Answer is NuKlear.

NuKlear... A revolutionary new high quality polymer coating that protects cedar shakes, wood decks and siding, against rain, UV, as well as the physical damage caused by bacteria, fungus and algae.

NuKlear Protects and Keeps Your Cedar Roof, Deck, and Other Wood Surfaces Looking New.

Why Recoat Every Year with the Well known National Brands When NuKlear Offers Superior Performance?

Far superior to conventional weatherproof coatings NuKlear prevents water adsorption by forming a long-lasting unbreakable, cross-linked, chemical bond that preserves the life and beauty of wood, concrete, bituminous or slate surfaces.

NuKlear provides a protective water barrier that also resists UV, and fungus attack. It repels water keeping wood surfaces from warping and rotting.

NuKlear is long lasting. Its hard crosslinked surface has survived over 1000 hours of salt spray tests. No other product available today can compare to NuKlear. Other products contain only 5% solids that can't penetrate and don't last.

Easy to apply with brush, sprayer or roller, NuKlear keeps wood and exterior surfaces looking new.

NuKlear is economical, providing long lasting protection for low cost per square foot!

Superior to any weatherproof coating, NuKlear is also safe and environmentally friendly! It has low VOCs

Plus, NuKlear:

- * Contains 37% solids (active ingredients) compared to 5% solids for well known competitive products
- * Dries to the touch in one hour
- * Has low offensive odor
- * Is permanently water repellent
- * Resists gas, oils
- * Is non-flammable and contains low VOC

NuKlear Shields your Home with an Invisible Barrier that Protects the beauty and integrity of virtually all its surfaces

- * Will not change the color or appearance of the substrate.
- * Can be built up by applying several coats
- * Contains a non-toxic fungicide (no Heavy metals)

	The Popular National Brand	NuKlear
Percent Solids	5%	37%
Hazardous Volatile Solvents	yes	no
Lasting Water Repellent	no	yes
Non-Toxic Fungicide	no	yes
UV Protection	no	yes

NuKlear Offers Superior Performance. It Outperforms the Competition and is the Klear Choice in Protective Coatings. For more info see our web site at www.wonderpaint.com
